Mohamed Ahmed Mohamed Ragab

System Administrator | Azure Track

+20 10 1440 4848 | mohamedahmedragab1412@gmail.com | LinkedIn | GitHub | Cairo, Egypt

PROFESSIONAL SUMMARY

Results-driven System Administrator with 3+ years of hands-on experience designing, deploying, and managing enterprise IT infrastructure. Proven track record across healthcare and multi-client environments, specializing in Windows Server, Active Directory, virtualization (Hyper-V & ESXi), and enterprise firewalls (Sophos & Fortinet). Currently expanding expertise into Cloud (Azure – AZ-104, MD-102) and DevOps/Containers, with a goal of transitioning toward Cloud Infrastructure and DevOps Engineering roles.

EDUCATION

BSc in Computer Science | New Cairo Academy, Egypt *2024*

WORK EXPERIENCE

IT Senior Application Support | CareHub *Jul 2026 – Present*

Full-Time | Healthcare Sector

- Managed IT infrastructure and technical support.

IT System Administrator | Pro Active *Sep 2024 – Present*

Part-Time | Managed Services | Multi-Client

- Managed IT infrastructure and technical support across 5 client companies (EEC, Linez, Kayan, ELT, and Minerals Egypt) through both on-site visits and remote support.
- Deployed and configured servers, network switches, NVR surveillance systems, and load balancing solutions.
- Implemented KLS backup monitoring and handled ongoing system optimization and troubleshooting for clients.

IT Specialist | IT Core | Freelance *Jan 2025 – Present*

Independent Consultant | Small & Medium Business Clients

- Rafal Company: Deployed Active Directory & File Server with enforced RBAC access controls.
- Al-Masry Company: Deployed AD, File Server, and Sophos Firewall for a small business environment from scratch.
- Designed and built complete network infrastructure (cabling, switching, firewall, RAID) for multiple SMB clients.

IT System Administrator | Tabarak New Cairo Hospital *Jul 2024 – Jul 2026*

Full-Time | Healthcare Sector

- Managed Active Directory, GPO, file servers, and firewalls (Sophos & Fortinet) for a multi-user enterprise environment.
- Administered a virtualized server environment across Hyper-V and ESXi platforms, optimizing resource allocation and reducing hardware footprint.
- Executed a full ESXi-to-Hyper-V migration with zero data loss (details under Key Projects).
- Implemented Veeam Backup across all servers and deployed Zabbix monitoring, enabling proactive incident detection and reducing unplanned downtime.
- Configured and managed the enterprise wireless network using the Omada centralized controller, including VLAN segmentation, guest authentication, and access control policies (details under Key Projects).

KEY PROJECTS

Tabarak New Cairo Hospital | Full Data Center Infrastructure Rebuild *2024*

- **Server Infrastructure** – Executed full ESXi-to-Hyper-V platform migration with zero data loss, including domain, file server, and Sophos & Fortinet firewall deployments. Deployed and configured Omada wireless infrastructure with VLAN segmentation and guest access control.
- **Data Network** – Restructured and administered the hospital data network using Omada controller, Omada managed switches L3/L2, and Omada enterprise access points, and reorganized all passive cabling from end-points to racks across all floors to ensure seamless connectivity across all hospital departments.
- **Telephony** – Restructured and administered internal phone system using Panasonic Central, ensuring seamless communication across all hospital departments.
- **Surveillance Systems** – Deployed and configured NVR-based surveillance infrastructure, ensuring full site coverage and system reliability.

Minerals Egypt | Greenfield IT Infrastructure Deployment (Pro Active) *2024*

- Delivered complete greenfield IT setup: network infrastructure, Active Directory & File Server, NVR surveillance, Omada controller, and firewall – from zero to production.

Docker Containers | Tabarak New Cairo Hospital *2024*

- Deployed Nginx and Apache containers with persistent storage and set up a self-hosted Nextcloud instance.

GITHUB PROJECTS & WEBSITES

Personal projects and websites are published on GitHub: github.com/m7mdragab14

COURSES

▪ Microsoft AZ-104 – Azure Administrator	▪ Hyper-V & VMware ESXi
▪ Microsoft MD-102 – Endpoint Administrator	▪ CompTIA A+ | Network+ (N+) | Security+ (S+)
▪ Linux Administration	▪ Sophos Firewall Administrator
▪ Docker & Containers	▪ Project Management – Redmine

TECHNICAL SKILLS

Systems: Windows Server 2016/2019/2022, Active Directory, GPO, Hyper-V, VMware ESXi, Ubuntu Server

Cloud: Azure (VMs, Storage, Networking, Policies)

Containers: Docker, Nginx, Apache, Nextcloud, Volume Mounting, Network Isolation (Learning: CI/CD, SDLC)

Networking: TCP/IP, VLANs, Load Balancing, Omada Controller, Aruba APs, TP-Link

Security: Fortinet, Sophos, Firewall Policy Design, Web Filtering, System Hardening, Access Control

Backup & Monitoring: Veeam, KLS Backup, Zabbix, DVR/NVR Systems

Tools & Scripting: PowerShell, CMD, Redmine

INTERNSHIPS

IT Officer | Tajan Azharia Languages Institutes *Jan – Jun 2024*

IT Help Desk | Brilliant Mind School *Jan – Jun 2023*
